

Button Functionality

iOS & Android

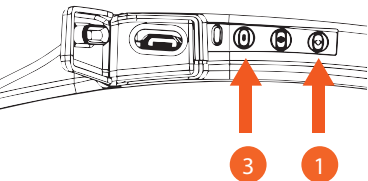

Middle Button

- 1) During a ride if you would like to pause the ride just tap the middle button² and tap it again to resume.
- 2) If you long press the middle button² for about 3 seconds, you will have completed a lap, and a new lap will start.
- 3) Press the middle button² to power up your headset. The green light will illuminate briefly. Hold the middle button² for about 5 seconds to power down your headset
- 4) Press the middle button² to accept and end the call and hold the middle button² for about 3 seconds to reject the call.

Android Only

When receiving an incoming text message press the middle button² to read a long text message.

Front & Back Button

- 1) During a ride you can skip forward to view available metric screens by pressing the front button¹ and skip back by pressing the back button³.
