CONNECTING YOUR HEADSET TO AN ANDROID DEVICE

CONNECT YOUR HEADSET TO AN ANDROID DEVICE

Step 1. Enable your phone's Bluetooth.

Go to your phone's Settings > Bluetooth > Turn Bluetooth ON.

Make sure your Solos headset is close to your mobile device.

Step 2. Create an account and from there you will be guided through the setup process.

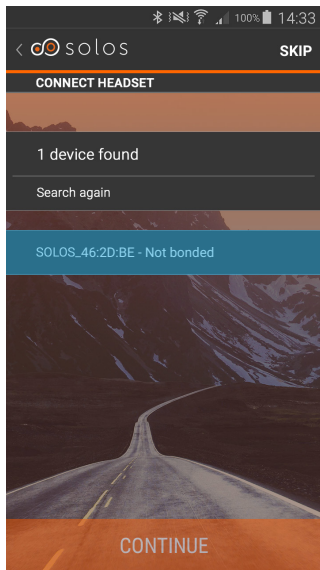

solos™

Step 3. Once you get to the 'Connect Headset' screen, you will be shown the headset found.

Select the headset on the list to start the connection process.

*If other devices appear, be sure to know your model name/number.

The ID will be displayed on your headset, for example in this format: SOLOS_46:2D:BE.

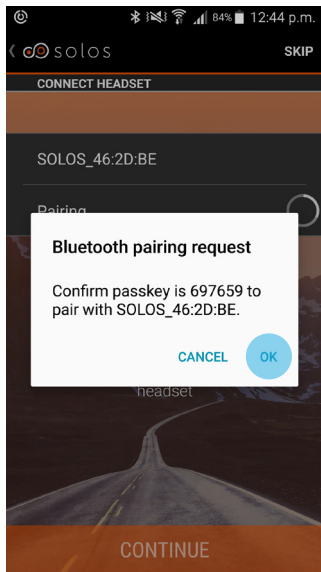

solos™

Step 4. Next you will see the pairing screen where you will receive a pairing request pop up.

* The headset and handset pairing keys should be the same.

Press 'OK' or 'Pair' and follow the next step...

solos™

Step 5. You will see the confirm passkey screen on your headset.
Press middle button on your headset to confirm.

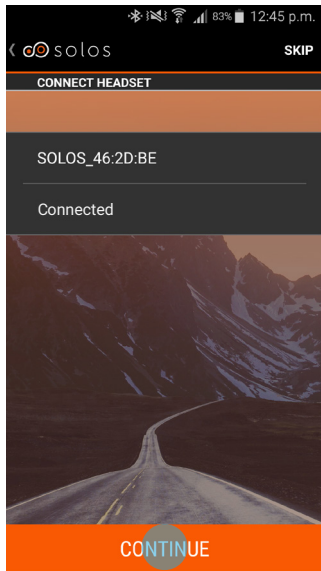

Press middle button to
confirm passkey: 697659

solos™

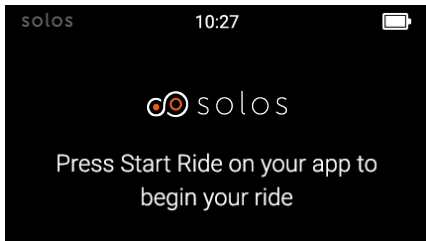

Step 6. Once you have paired successfully you will see this screen.

Press continue to connect to your sensors and log into third party apps to share your rides.

solos™

Step 7. This is the screen you will see on your headset once you have successfully connected.

You're ready to ride once you've completed the setup process!
